- English
- Amharic

## ABOUT ME

Hello! I'm Hana Melese, a passionate third-year Software Engineering student at Addis Ababa University. My journey in tech has ignited a strong focus on web development, where I thrive on creating dynamic and user-friendly applications.

With hands-on experience in cutting-edge technologies like React, Node.js, and Express.js, as well as databases like MySQL and MongoDB, I enjoy transforming complex problems into elegant solutions. I have a keen interest in data structures and algorithms, particularly using Python, allowing me to tackle challenges with confidence.

In addition to web development, I am also an avid mobile app developer, specializing in Flutter and Kotlin. I love bringing ideas to life through innovative mobile solutions.

## PROJECTS

### AI-chat-bot

<https://hanamelese.github.io/Netflix-Clone-2025/>

### Netflix

<https://hanamelese.github.io/Netflix-Clone-2025/>

### Charity organisation website Api
